*yield at 6% page coverage

Toner features: Compatibility with OEM: Raven toner is 100% compatible (forward and reverse) with OEM toner.

Customize this product with your logo!

Special note: Chips are not provided with Raven's MATK717, MATK715, OVTCOPIA300MF and UTXCD1230 cartridges.

When powering up machine or installing a new toner cartridge, you will receive a message indicating "unknown toner installed." This message will disappear within 2 seconds and the machine will operate normally. Also, as a result, some machines models may not provide complete details on the toner status report.

Raven has made the decision to not provide chips with these cartridges due to the unreasonably high cost and the minimal effect to the end user.
